

The **HATEFISH CREW** imagine an alternative 19th Century, where a renegade super submarine roams the oceans, crewed by free men and women of all nations.

We are a private group, as envisioned by our founder and Captain Tim Finkas, who share a love of history and speculative fiction (especially Jules Verne), and in remembrance of Tim, whom we lost to cancer, we encourage donations to support the cutting-edge gene-based therapies being developed by his widow, cancer researcher Dr. Lisa Butterfield.

The challenge to the crew is to dress and equip ourselves in a manner consistent with the norms of the Victorian era, free of non-historical clichés, which invokes this vision of a vibrant alternative reality.

The voyage continues...

Our Captain
